

## LB-1000

### Frequently Asked Questions

#### **Can I use the LB-1000 to test multiple batteries?**

The LB-1000 is designed for single battery charging, activation, and discharging.

#### **What cell types are compatible?**

The LB-1000 works with all common cell types including 1.2, 2, 6, & 12V.

#### **Could I use any feature independently?**

Yes, the LB-1000 can use any feature in conjunction with another or completely independently.

#### **What does the activation function do?**

The main purpose of the activator function is to reinvigorate older disabled plates to get improved performance out of the battery.
