

VS-12-110VAC Fan: Product Enhancement Brief

We're pleased to share that the VS-12-110VAC Ventilation Fan has answered the call for increased airflow – While upgrading the CFM by 23%, we've made additional improvements, incorporated as part of Eagle Eye's ongoing product development. These enhancements maintain the same part number, same installation, and the same price (Made in the USA – Lincoln, NE).

You'll get:

- Same form, fit, and function
 - Same mounting and electrical interface
 - Enhanced product features
 - Requalification is unnecessary
-

Upgrade List (Now Included):

- **Dedicated Ground Conductor & Bonding** – Meets NFPA/NEC safety standards.
 - **Enhanced Inline Fuse** – Listed protection for added circuit reliability.
 - **Upgraded Terminal Design** – Secure, approved splices for lasting connections.
 - **Cleaner Internal Architecture** – Improved shielding and organized layout.
 - **Durable Mechanical Structure** – Stronger, all-metal design for longevity.
 - **Increased Airflow** – 850 → 1,050 CFM (23% boost) with no change to footprint or install.
-

These changes are part of Eagle Eye's continual commitment to product quality and long-term reliability. No part number or price changes are required - Only added value.
