TWO-DAY COURSE

Hands on Battery Maintenance for Utilities

Gain hands-on experience in battery maintenance, testing, and safety with the "Battery 102" course, designed to enhance reliability and performance in real-world applications.

SUBJECTS COVERED:

Day 1:

9AM – 5PM

Batteries & Compliance

Covering battery basics, NERC and IEEE standards, plus compliance feedback on application, sizing, accessory selection, and AC ripple.

Installation

Focus on pre-install battery inspection, proper storage, installation with isolation procedures, and compatible chargers.

Establishing a Battery Maintenance Plan

Routine inspections, testing protocols, record-keeping, and preventative strategies to ensure long-term reliability and compliance.

Day 2:

9AM – 5PM

Safety & Regulatory Requirements

Briefing for battery lab training, covering key hazards, PPE essentials, safe handling protocols, and compliance with IEEE, OSHA, and NFPA standards.

Hands On Lab Training

- Visual Inspection
- Battery Charging
- Jumping-Out Cells
- Locating a Ground Fault

Scenario Tests

Group work to address a simulated "situation," formulate a corrective action plan, and present it to the group.

TRAINING TAILORED TO YOU!

Bring Your...

- Portable testers for specific training
- PPE including FR gear, Safety Now!
